Skills ———————

Education

GPA: 3.83 / 4.0
Grades: 90.373 / 100
Rank: 1 %

Hours and Awards

2016-2017	First Class Scholarship (Scale: 5%), WHU
2016-2017	Excellent Student (Scale: 1%), WHU
2016-2017	Excellent League member (Scale: 1%), WHU
2015-2016	National Scholarship (Scale: 1%), China
2015-2016	First Class Scholarship (Scale: 5%), WHU
2015-2016	Excellent Student (Scale: 1%), WHU
2015-2016	Outstanding student cadres (Scale: 1%), WHU

Research Experiences

- As an intern of Network Information System Security & Privacy Lab (NIS&P), Xueyao is supevised by Professor Yanjiao Chen now.

- Xueyao is now occupied with the research of Click-Through Rate (CTR), Ad Fraud Detection, and Recommendation System by means of data mining, machine learning and deep learning.

Curriculum Experiences

- Teaching Assistant (TA), Human-Computer Interaction, Spring 2018

- Teaching Assistant (TA), Object-Oriented Programming (Java), Fall 2017

- Online Courses of Cousera: Deep Learning Specialization

  - There are 5 courses of the Specialization, including Neural Networks and Deep Learning, Improving Deep Neural Networks, Structuring Machine Learning Projects, Convolutional Neural Networks, and Sequence Models.

  - The courses is published by deeplearning.ai and taught by Andrew Ng.

  - I passed all the exams and got the certificate of Cousera.

Competitions and Projects

2018.3-2018.5	TalkingData AdTracking Fraud Detection	Top 30% over 3500 teams

- This is a competition published on Kaggle, whose dataset is supplied by TalkingData.
- We two-person team are challenged to build an algorithm that predicts whether a user will download an app after clicking a mobile app ad.
- We're trying to apply some models, such as LR, FM, GBDT, and DNN, and empirical research indicates that staking models which is ensembled with GBDT/LR and DNN/LR/FM works the best.

2018.4-2018.6	Lanqiao Cup Programming Competition	First Prize of Hubei Province

- Lanqiao Cup is a programming competition which is held by Ministry of Industry and Information technology Talent Exchange Center (MIITEC).
- All competitors are challenged to solve serval problems in limited 4-5 hours.
- Thecompetitionisgoingonanduntilnow,Ihavebeenawarded FirstPrizeofHubei Province (Scale: 10%) and got the ticket for final contest all over China in June.

2017.10-2018.3	CloudClass: An online course platform	Java Backend Developer

- CloudClass is a cross-platform application on Windows, MacOS, Android and iOS. There is an around 30-person developing team.
- The whole application is builded by Microservices architecture and we s elect Java as backend developing language.
- As one of the backend developers I complete LogManagement module, including logs record, traffic detection and analysis.

Extracurriculum Activities

2016.3 - 2016.10	Product Vice Manager, Taoke.Ziqiang.Stutio
2016.6 - 2017.6	President, Arts Department of Student Union, ISS, WHU
2015.9 - now	Monitor, Class 5 of Software Engineering, WHU
